

Satyam Awasthi

 orcid.org/0000-0002-6095-4303  satyam.aw@yahoo.com  linkedin.com/in/satyam-awasthi/  github.com/SatyamA007

Research Focus

- * Spatial AI & Computer Vision
- * Ubiquitous Computing & AR
- * Human-Computer Interaction (HCI)

Technical Core & Methods

- * Sequential Deep Learning
- * Sparse Coding & Latent Topic Modelling
- * Sequential Decision Making

SKILLS

Programming/Scripting Languages: (Proficient) Python, Kotlin, Java, C++ (Skilled) Javascript, CSS, HTML, SQL

Frameworks and tools: OpenCV, Android SDK, PyTorch, TensorFlow, Scikit-Learn, Amazon EC2, Google Colab, Unity

EDUCATION

M.S., Computer Science, University of California, Santa Barbara

Sep 2021-March 2023

3.91/4.00 CGPA

Bachelor of Technology, Indian Institute of Technology, Kharagpur

Jul 2016-Jul 2020

Major in Electrical Engineering | Minor in Computer Science | 8.98/10 CGPA

REFEREED CONFERENCE POSTERS

- * S. Awasthi, V. Ross, S. Lim, M. Beyeler, and T. Höllerer, "Eye Tracking Performance in Mobile Mixed Reality," in 2024 IEEE Conference on Virtual Reality and 3D User Interfaces Abstracts and Workshops (VRW), Orlando, FL, USA, 2024, pp. 1011-1012, doi: 10.1109/VRW62533.2024.00321. (Funded by **NSF** Grant #2211784)
- * S. Awasthi, V. Ross, M. Beyeler, and T. Höllerer, "EyeTTS: Evaluating and Calibrating Eye Tracking for Mixed-Reality Locomotion," in 2023 IEEE International Symposium on Mixed and Augmented Reality Adjunct (ISMAR-Adjunct), Sydney, Australia, 2023, pp. 479-480, doi: 10.1109/ISMAR-Adjunct60411.2023.00104. (Funded by **NSF** Grant #2211784)
- * S. Das, S. Awasthi, A. Shamnan, P. De, S. Chakraborty, and B. Mitra, "SmartWatch for Wall Writing: Real-time Transcription of Wall Writing from Inertial Sensing," in 2022 14th International Conference on COMMunication Systems & NETWORKS (COMSNETS), Bangalore, India, 2022, pp. 675-683, doi: 10.1109/COMSNETS53615.2022.9668531.

PROJECT EXPERIENCE

- * [JitterNot](#), an Adaptive Bitrate for Video Conference Applications with a closed-loop control system: an LSTM model for contextual prediction (throughput, Quantization Parameter, frame jitter) and an ABR algorithm, that utilizes the MPC
- * [Tweeter](#) (team project), a twitter-like micro-blogging web app. Ruby on Rails BE, PostgreSQL DB, React FE, deployed on Elastic Beanstalk, and automated load testing via Tsung.
- * [CohesiveAR](#) allows developers to select and apply real world textures on virtual scene objects for a seamless transition between virtual and physical objects in a scene in real-time.
- * [3D Maze game](#) in OpenGL for Computer Graphics CS280 S22 (UCSB)
- * [Spell-Training-in-VR](#), an innovative interaction system based on mid-air sketching, uses cast spells from their magic wand

INDUSTRY EXPERIENCE

Software Engineer 2 - Android, Intuit Inc, Mountain View, CA

March 2024-Jan 2026

- * Developed the Intuit Data Exchange (IDX) Android SDK and Web Components to import data from external sources like banking, email, and calendar accounts.
- * Built features powered by Intuit's AI/ML workbench like GenUI (dynamically modify the UI based on the user's intent), IDX support channel Slack bot that uses MCP servers for JIRA and Splunk tools to help Intuit engineers integrate with IDX

Software Dev Engineer II (IC3), Yahoo Inc, Mountain View, CA

April 2023-Nov 2023

Contributed to the Inbox Commerce team's projects within the Yahoo Mail app, including:

- * Redesigning the Top of Inbox UI into a dynamic carousel format. This enhancement resulted in a substantial increase in revenue in price per click (PPC avg of past 60 days), +95% or \$52.93 mil annually
- * Led Android development for the Expense Management Squad, creating Subscription Manager, and integrating utilities and bill management into the Receipts Tab. Aiming to empower users to optimize recurring expenses

Software Engineering Intern, Coupang Global LLC, Mountain View, CA

June 2022–Sep 2022

- * Developed features for the mobile shopping app: search filter, top selling items widget, view multiple images on user swipe
- * The above were successfully incorporated into prod after ensuring the quality thresholds and sales KPI increments

Software Engineer (CL 2), Samsung Research Institute, Noida

Sep 2020–Sep 2021

- * Lead developer for building privacy app, coordinated with 3 external teams for its release in Samsung flagships
- * Received Samsung Spot Award for the app design, demonstrating effective privacy control and robust maintainable code
- * Contributed to feature addition and debugging of Samsung's VisualVoiceMail system while learning underlying frameworks

Software Engineering Intern, Samsung Research Institute, Noida

May 2019–Jul 2019

- * Developed a movie rating app that identifies a movie from its poster using image classification and OCR techniques
- * Presented my work to the Samsung Mobile Apps committee, got accredited as inspirational for coming media apps

TEACHING EXPERIENCE

Teaching Assistant, University of California, Santa Barbara

Sep 2021–March 2023

Led sections, **taught** students, drafted exams, **designed curriculum** for upper level undergraduate courses - CS184: Application development for Android and CS189: Capstone course. And foundational courses - CS16: Problem Solving with Computers I and CS 24: Problem Solving with Computers II
